CR SERIES  
LP-GAS CYLINDER  
STORAGE CABINETS

© 2002 H&H Sales Company, Inc.

## Trust H&H cabinets to store and protect your LP-Gas motor fuel cylinders

**Model CR-112**

**Model CR-212U** — This cabinet has a certificate of approval No. 4722 from the City of New York Fire Department.

Space-saving storage cabinets from H&H help you meet applicable storage requirements and regulations by keeping LP-Gas motor fuel cylinders organized and secure.

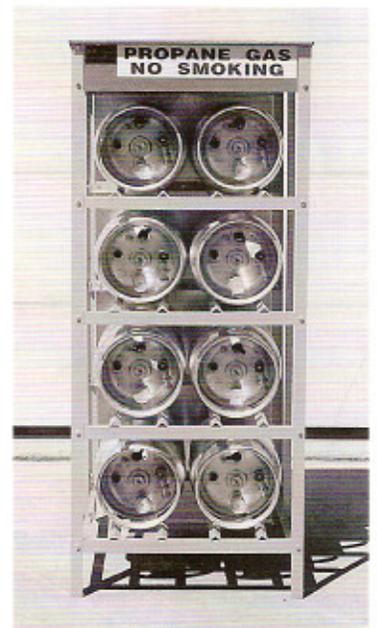

H&H offers four cabinets for storing up to sixteen cylinders horizontally and two cabinets for storing either six or twelve cylinders in an upright position. These cabinets are ruggedly constructed with reinforced backs and doors and meet the following standards:

*OSHA — Subpart H, sec. 1910.110*

*National Fire Protection Assoc. — 58-2001, sec. 5*  
H&H upright storage cabinets meet New York City requirements for LP-Gas motor fuel cylinder storage.

All H&H LP-Gas motor fuel storage cabinets are built to accommodate 20, 30 or 43 lb. cylinders and may be bolted to the floor. A tamper-proof padlock hasp and drop hinges welded to the door and cabinet frame are standard.

Bolt-together design makes these storage cabinets easy to assemble with basic hand tools. Replacement parts are available from H&H.

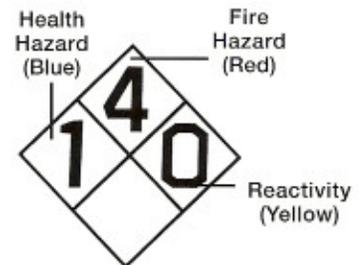

**Note** — All models available without doors and side screens at lower cost.

Specifications	Model No.	Cylinder Storage Capacity	Outside Dimensions W x D x H	Net Weight
